Subject: Emissions Summary on 2007 Chevrolet Impala with Centron Fuel Additive

Mr. Suhy,

Roush Emissions Laboratory, an EPA recognized emissions test facility, has conducted tailpipe emissions testing over the FTP75 (“City”) test schedule in accordance with CFR40 – Part 86.

The following are the test results and vehicle information:

Vehicle Make: Chevrolet
Vehicle Type: Impala
Base Fuel: 87 Octane (R+M)/2
Test Fuel: 87 Octane (R+M)/2 with Centron

	Weighted NOx (g/mi)	Weighted THC (g/mi)
FTP75 with Base Fuel	0.017	0.041
FTP75 with Base Fuel and Centron	0.012	0.037
Percent Decrease with Centron	-30.77 %	-9.44 %

NOTE: The results are averaged over a series of three (3) or more tests, each conducted in the exact same test configuration with the same fuel.

Sincerely,

Timothy Werner
Manager
Roush Emissions Laboratory
